

EdMetrix Students Development

In today's global scenario, a student's academic result alone does not guarantee success & growth in his/her future aspirations. We believe that the key to success is in choosing the right career path at the right age with adequate intelligent data and continuous support for enhancement & exploration. **EdMetrix Life Coach** - is based on this principle of education, interactivity and holistic development.

Students apart from academic goals should be aware of other important facets such as Emotional Intelligence, Systems Intelligence, Social Intelligence, Technical Intelligence, and Personality Development, to be able to identify and work towards their goals.

Content & Delivery – The assessment is designed for different age groups of students keeping in mind their level of understanding with the help of real life situations and examples, and introducing the modules in a phased manner depending on the age group.

We at EdMetrix have developed a model wherein every individual student can avail professional coaching services, continuous and most importantly interactive learning from their institutions throughout the year supplemented with regular seminars, workshops by experts.
